Cambridge Architectural Launches New Web Site and Introduces New Brochures

CAMBRIDGE, MD... Cambridge Architectural, America's leading manufacturer of architectural mesh systems, has launched a new Web site and introduced two new product brochures.

"Our new marketing materials are designed to educate our customers about the unlimited opportunity to achieve custom aesthetics, functionality and economy with our mesh systems," explains Kevin Mayer, Cambridge's director of business development and marketing.

Cambridge's new Architectural Design Guide and TECH SPECS product brochure, along with a re-designed Web site: www.CambridgeArchitectural.com, promote a better understanding of Cambridge's mesh systems and the innovative ways each system can be used to achieve both artistry and function. Much of Cambridge Architectural's mission is to encourage architects simply to experiment with mesh systems.

The comprehensive new web site enables visitors to browse through a project gallery, view mesh systems, analyze cost, services and installation options, and read current news and information about Cambridge Architectural.

The Architectural Design Guide provides architects and designers with an overview of Cambridge Architectural's mesh systems, including Façade, Space Sculpting, Corporate Branding, Security and Safety, Solar, Ventilation and Landscape Interiors. Specification details are available in the TECH SPECS product brochure, offering information about each system, available attachment hardware and compatible patterns of metal fabric.

"The process for architects, engineers, owners, developers and contractors to inquire about our products is simplified, and they will receive almost immediate feedback to their specification needs," explains Mayer.

Cambridge Architectural is the leading American manufacturer of architectural mesh systems. The elements of a Cambridge system include the attachment hardware and the metal fabric. Systems include Façade, Space Sculpting, Corporate Branding, Security and Safety, Solar, Ventilation, and Landscape Interiors. For more information about Cambridge Architectural call 1-866-806-2385 or visit www.CambridgeArchitectural.com.
